WORKING WITH THE DATASETLOADING THE DATASET

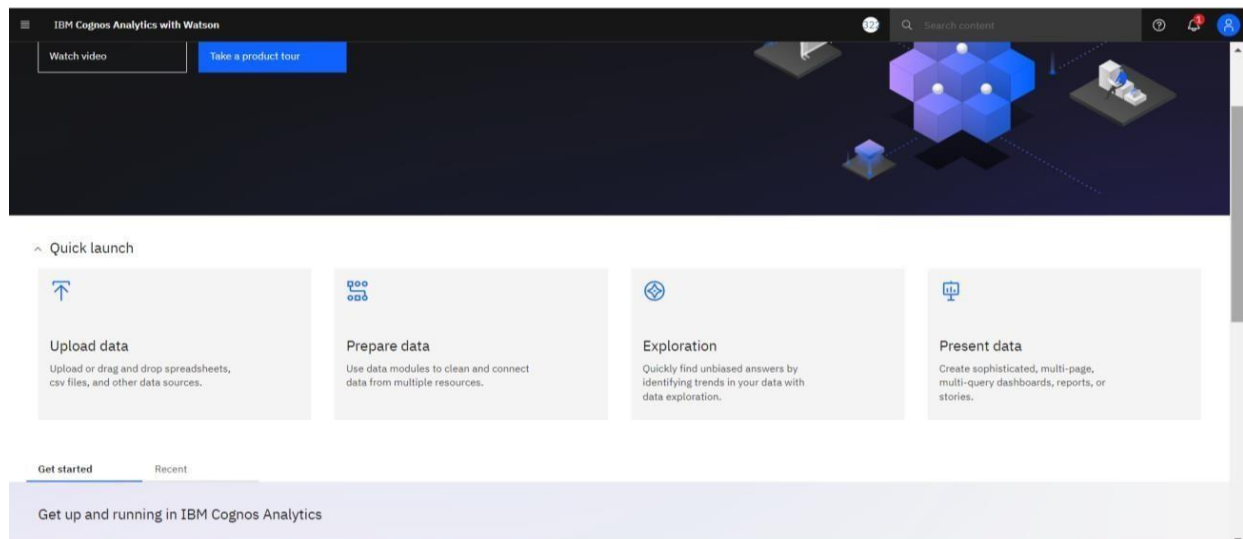

Before you can build a view and analyze your data, first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places. The data might be stored on your computer in a spreadsheet or a text file. In our case, we will be using a spreadsheet or text file for making our analysis.

The screenshot shows a web browser window with the address bar displaying '127.0.0.1:8000/sales/details/1/'. The page title is 'Sales Prediction and Reporting'. The main content area is titled 'SALES DETAILS' and contains a table with the following data:
